

DRAGONFLY

Flame System

The DragonFly flame system is an economical solution for applications that require a large flame effect up to 30 feet high! The system comes complete with controller, accumulator tank and all cables and hoses. The DragonFly complies with applicable codes and bears the ARL testing lab's certification. The DragonFly uses a standing pilot system controlled by a intermittent pilot module to assure reliable and safe light-off. A CE listed version is also available. The Dragonfly is available with or without a road case.

BURNER HEAD

- 16"x18"x10"
- 26LBS
- 24 VAC 50/60 Hz, 3amps
- 14k BTU/sec at 60psi
- 20-gallon vapor accumulator

CONTROL PANEL

- 8"x8"x6"
- 8LBS
- 120/240 VAC 50/60 Hz, .5/.25 amps
- Custom controls available
